To Whom It May Concern,

It is with great pride and absolute confidence that I recommend **Nahom Debebe**, an extraordinarily gifted and motivated student at ODA Special Boarding School. As his ICT teacher, I have had the privilege of guiding Nahom through various areas of technology, and I can say without hesitation that he is one of the most talented students I have ever taught.

Nahom possesses exceptional skills in web development, programming, cybers ecurity, server management, hardware maintenance, software development, and digital editing. His passion for ICT is not just theoretical, he actively applies his knowledge to real-world problems. Notably, Nahom has developed software tools for our school, including web-based platforms, cyber security solutions, and systems that address school-level challenges with practical, problem-solving approaches.

His creativity, technical expertise, and problem-solving mindset enable him to take on complex tasks independently and successfully. He not only builds functioning systems but also understands the principles behind them, including secure coding practices, system architecture, and user-focused design.

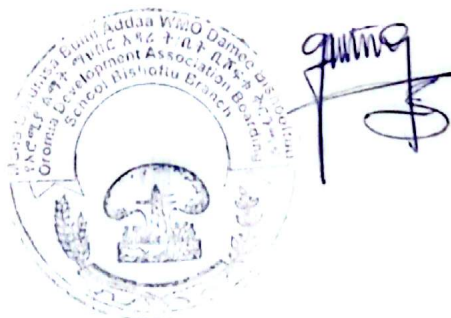

Nahom is also an outstanding team player. He collaborates respectfully with peers, explains technical concepts clearly, and always brings a solutions-first attitude to group work. He is dependable, focused, and highly disciplined, qualities that are as vital as his technical ability.

In all my years of teaching ICT, I have rarely encountered a student with such a strong combination of technical depth, innovation, and character. Nahom Debebe has my strongest possible recommendation for any academic, professional, or technological opportunity. He will be an immediate asset and a long-term leader in any program or institution fortunate enough to welcome him.

Sincerely,

Mr. Misgana Ayana
